

ACT3 VPN setup Windows 10 08/12/20

I will cover two methods to install CiscoAnyconnect on Windows 10

Method 1

in your browser type in <http://vpn.act3-ace.com>

A screenshot of a 'Login' dialog box. The dialog box has a title bar with a key icon and the word 'Login'. Inside, it says 'Please enter your username and password'. There are three input fields: 'GROUP:' with a dropdown menu showing 'ACT3', 'USERNAME' with a red asterisk indicating a required field, and 'PASSWORD'. A 'Login' button is at the bottom right.

on this screen select the following

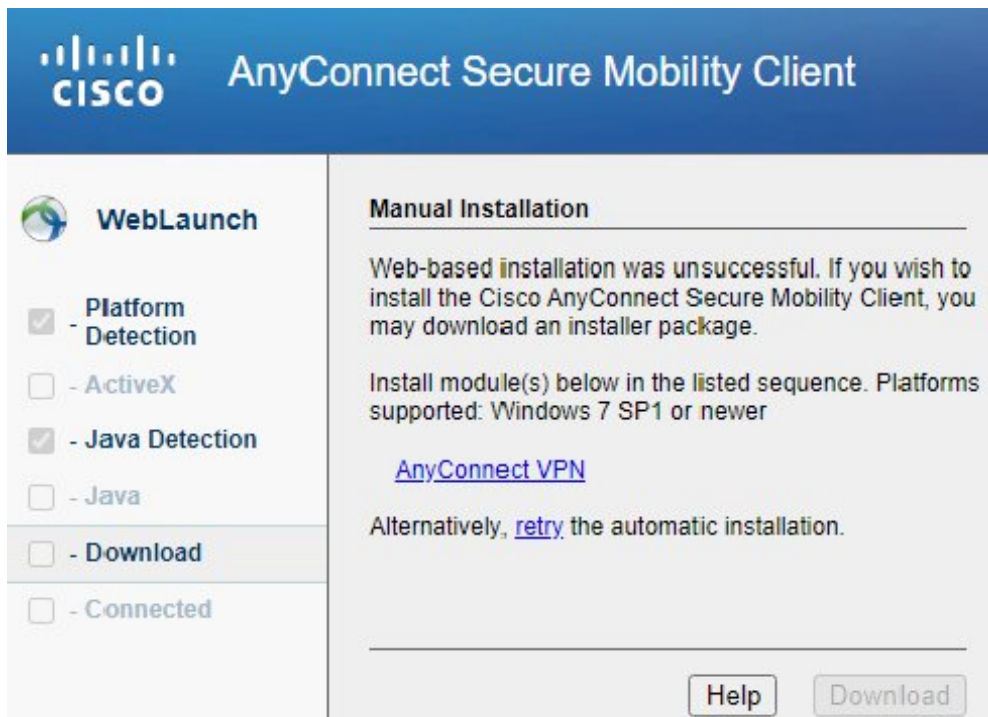

Group: ACT3

User Name: your Active Directory login

Password: Your Active Directory Password

Click Login

*****Having built multiple VMs to test this install I have gotten this message every time so I will cover the manual instalation here. *****

Click the link that says AnyConnect VPN
this will begin a download

Left Click the Download

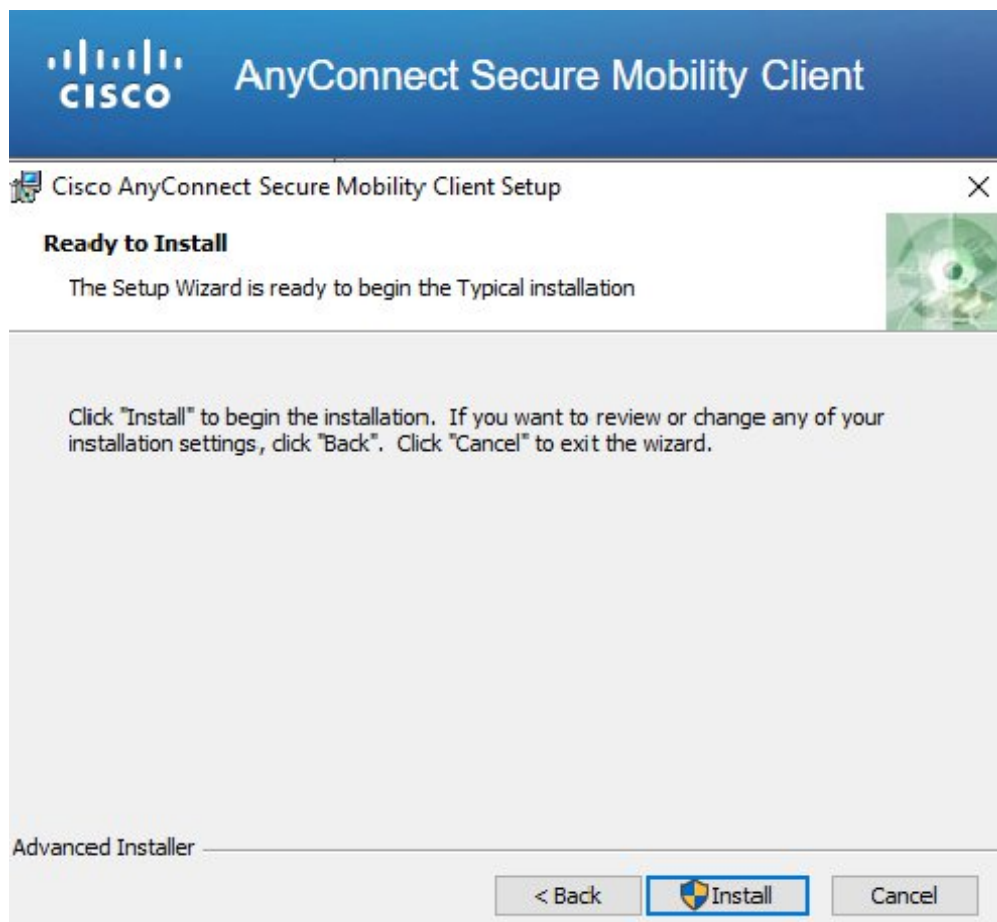

Click Next

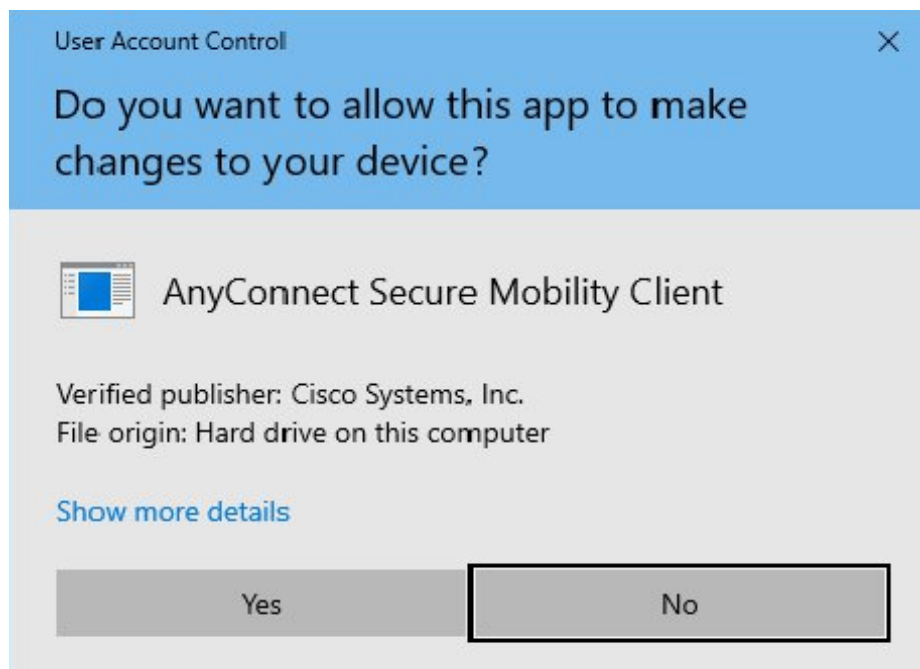

Select the "I Accept the terms in the License Agreement " Option

click Next

Click Install

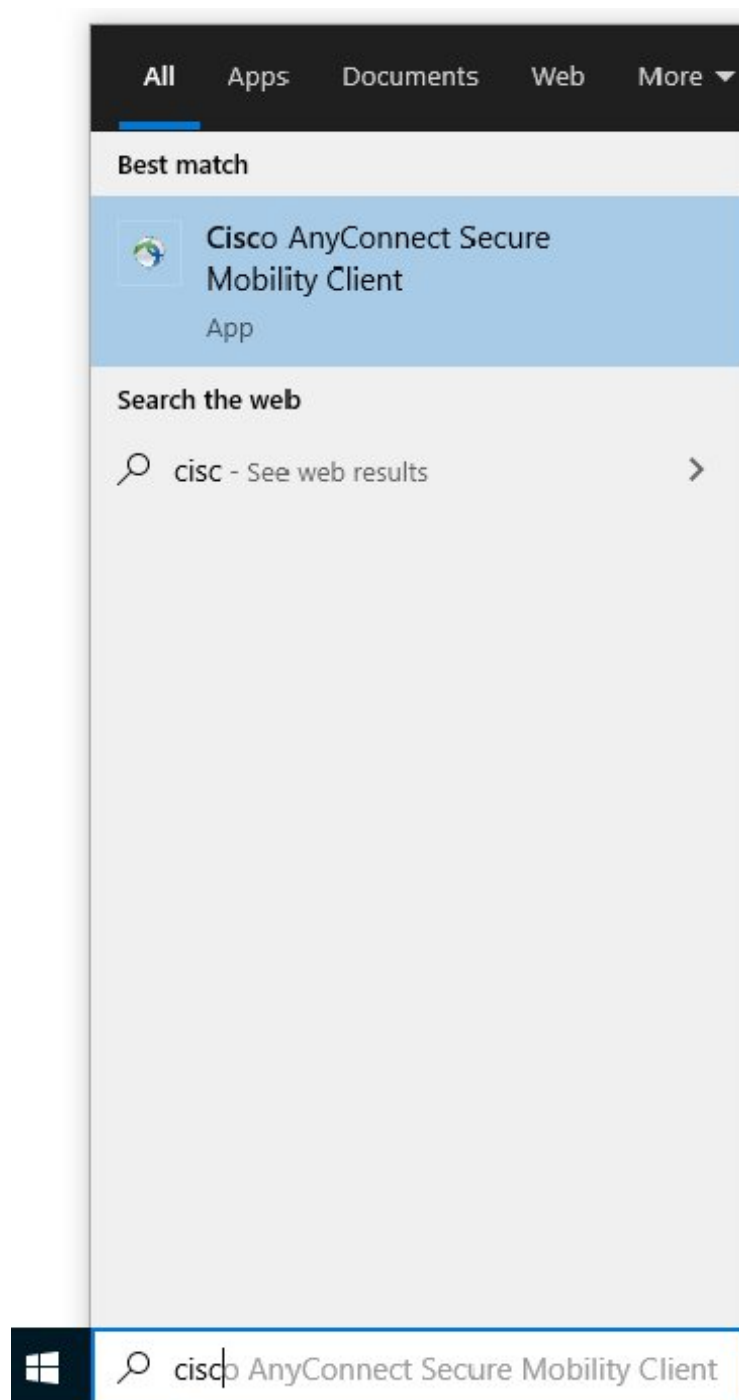

Click Yes

Click Finish

Click the Windows Button in the bottom left of your screen.

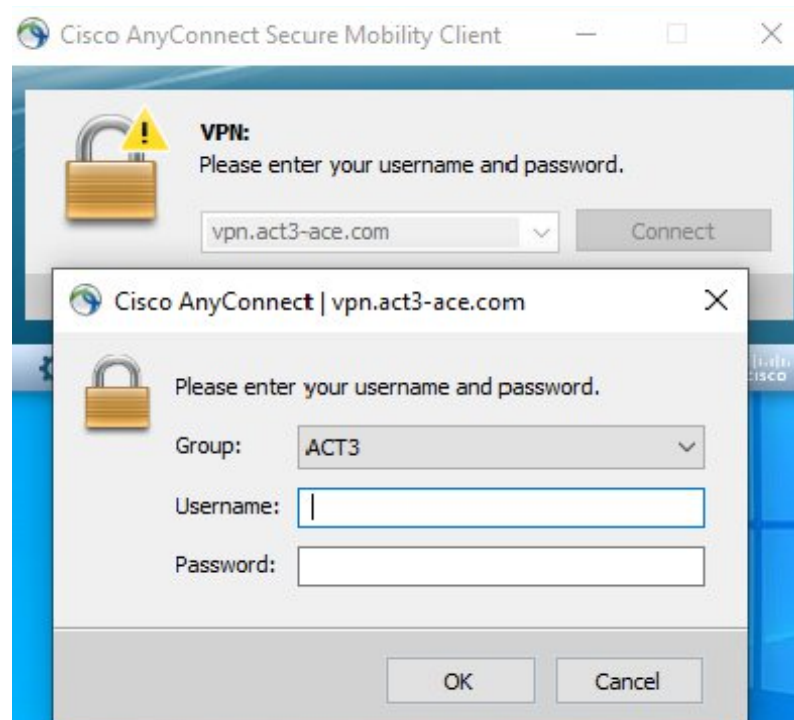

Type Cisco into the search bar you should see the Cisco Anyconnect App (seen here under best match)

Click on the Cisco AnyConnect App

Type: **vpn.act3-ace.com**

Click Connect

Group: ACT3

User Name: your Active Directory login

Password: Your Active Directory Password

Click: OK

These boxes should go away and YOU ARE NOW CONNECTED TO THE ACT3 VPN!

You can check this by clicking the arrow at the bottom right of your screen.

The AnyConnect logo should be present in the pop up menu (you can see it here with the little padlock on the bottom left.)

The lock indicates that you are connected.

You are now connected to the Act3 vpn.

***If this is your first time logging into your account you will see a prompt for you to change your password.**

When you set up your new password it will need to follow the

The following Password Rules

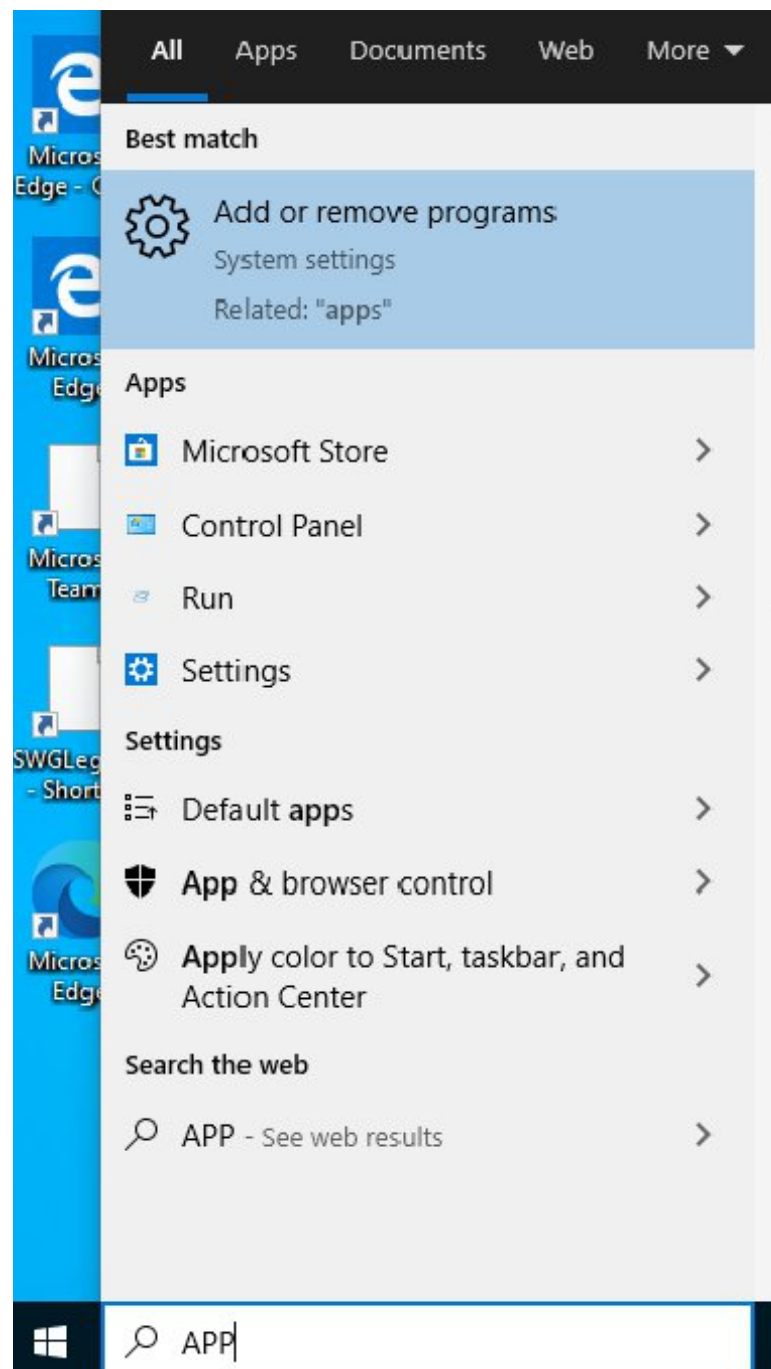

- 1. At least 10 total characters**
- 2. At least 1 Capital letter**
- 3. At least 1 Number**
- 4. At least 1 Special character**

You are now connected to the VPN and your Active Directory account for Act 3 is ready to go.

Act3 VPN Setup Method 2

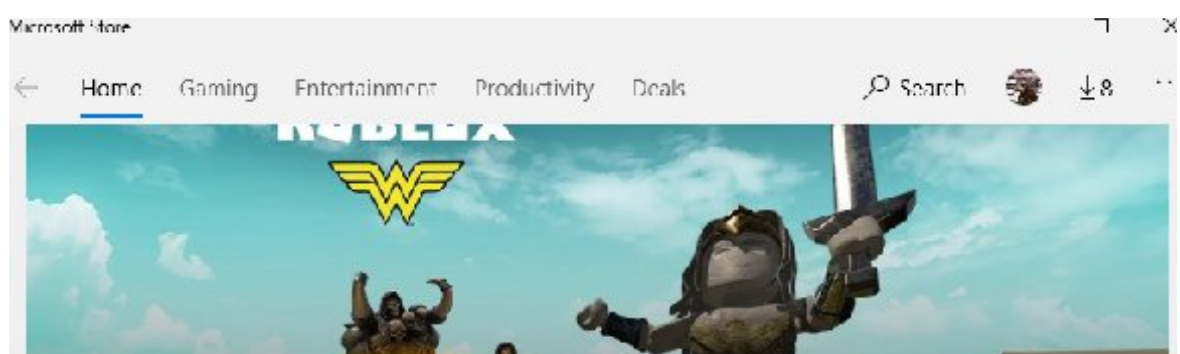

For this method we will download the AnyConnect client directly from the Microsoft App Store

Click the windows Icon in the bottom left of your screen

Type App into the search bar

Click Microsoft store

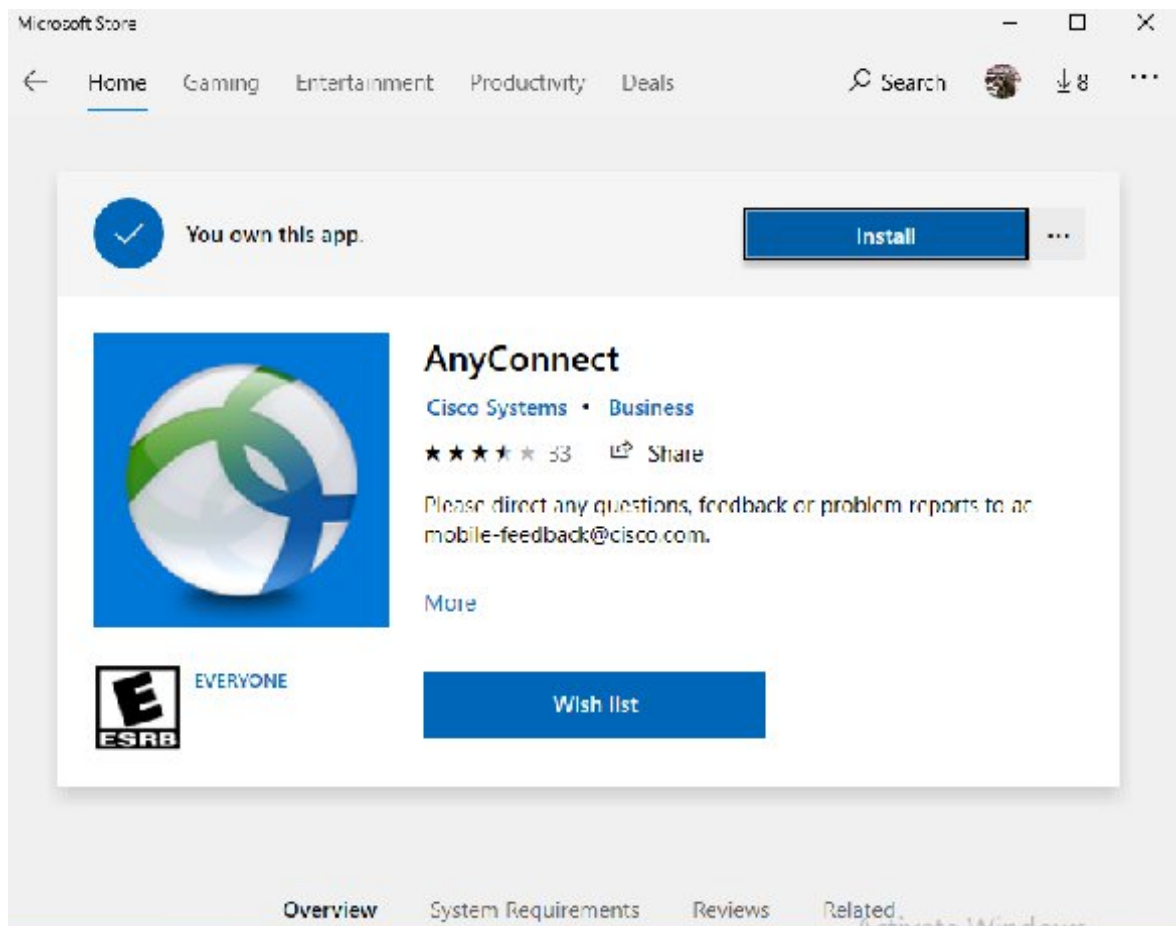

Click Search

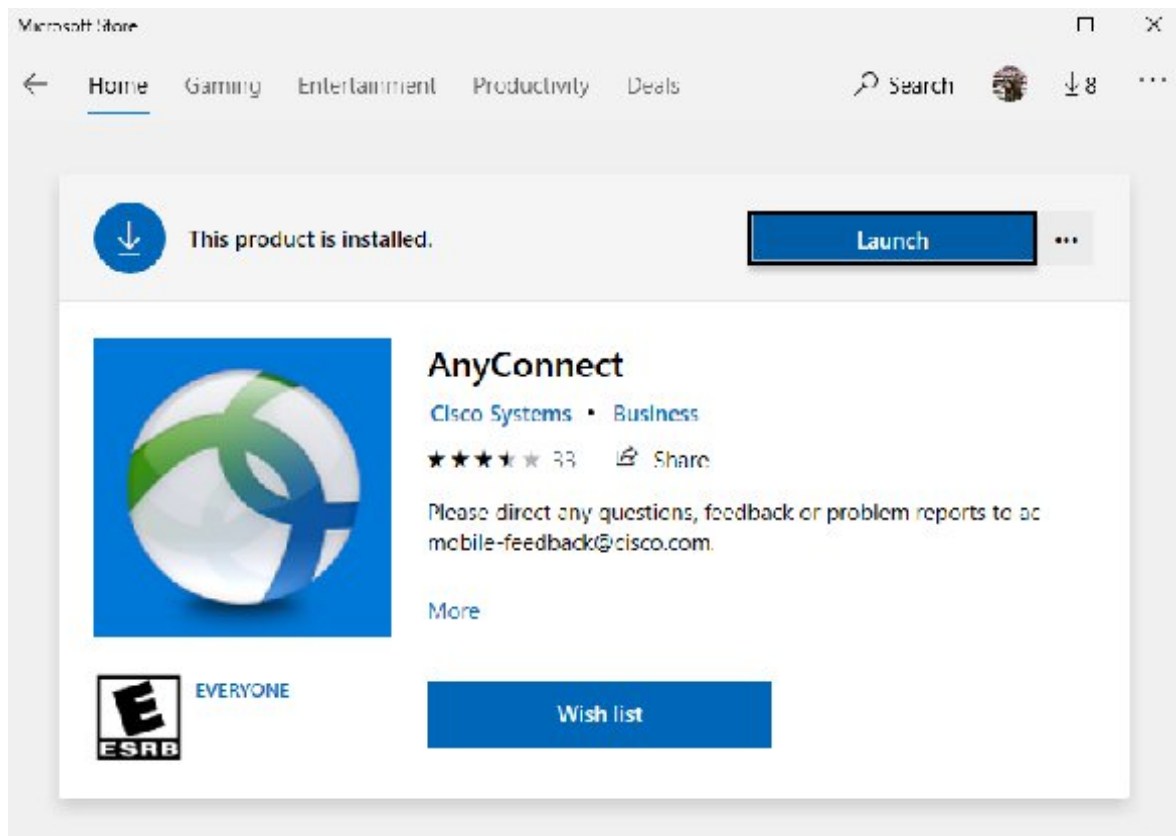

Type AnyConnect into the search.

Click on the AnyConnect App Pop-pup
